## **Fundamentals Of Flying Star Feng Shui :The Time Factor The Facing Direction The Interaction of the Five Elements** Ulrich Wilhelm Lippelt

"Flying Star Feng Shui is based on identifying the strongest of all the different energies, which enter a building through its openings from many different directions at different times, because the strongest energies have the strongest influence on the lives of the occupants.

Flying Star Feng Shui" therefore deals with the time factor of buildings represented by the so-called time stars, which are the strong basic directional energies in a building, captured in it during a specific period in time. The facing direction is the direction from which the strongest energy enters a building and spreads throughout it. This energy is represented by the facing stars which in combination with the time stars create strong energy combinations, which can be beneficial or harmful to the occupants.

The interaction of these energies with each other happens in accordance with the system of the five elements, which are the five ways, in which the overall creative cosmic energy is active. The system of the five elements allows us to influence the energies in a building to our advantage by weakening the destructive and enhancing the beneficial ones.

Different traditional Chinese schools of Feng Shui have different and sometimes conflicting views on the time factor, the facing direction and the interaction of the five elements. The book explains these diverse views for the reader to understand on what they are based on and thereby helps to come to a decision, which system to follow.

The book gives valuable information on how to correctly apply Flying Star Feng Shui, which can help to protect us from unfair competition, economic and professional failure, failing health and unmerited legal and other charges.
