## **Integrating Research and Practice:: Health System Leaders Working Toward High-Value Care: Workshop Summary** IOM Roundtable on Value & Science-Driven Care, Institute of Medicine

Health care has been called one of the most complex sectors of the U.S. economy. Driven largely by robust innovation in treatments and interventions, this complexity has created an increased need for evidence about what works best for whom in order to inform decisions that lead to safe, efficient, effective, and affordable care. As health care becomes more digital, clinical datasets are becoming larger and more numerous. By realizing the potential of knowledge generation that is more closely integrated with the practice of care, it should be possible not only to produce more usable evidence to inform decisions, but also to increase the efficiency and decrease the costs of doing clinical research.

Patient-Centered Clinical Research Network, or PCORnet, is a nation-wide patient-centered clinical research network intended to form a resource of clinical, administrative, and patient data that can be used to carry out observational and interventional research studies and enhance the use of clinical data to advance the learning health care system. The primary goal of the first phase of PCORnet will be to establish the data infrastructure necessary to do such research.

In April and June 2014 the Institute of Medicine's Roundtable on Value and Science-Driven Health Care convened two workshops aimed at accelerating progress toward real-time knowledge generation through the seamless integration of clinical practice and research, one of the fundamental concepts of a continuously learning health system, centered on the development of the PCORnet. The first workshop brought together health care system leaders, both administrative and clinical, and researchers to consider issues and strategic priorities for building a successful and durable clinical research network and facilitate progress toward a continuously learning health care system more broadly, including issues related to science, technology, ethics, business, regulatory oversight, sustainability, and governance. The second workshop focused on implementation approaches. Health system CEOs convened to consider strategic priorities and explore approaches to implementation. These workshops will inform the decisions of field leaders moving forward, including PCORI, the PCORnet steering committee, and PCORnet grantees. *Integrating Research and Practice* is the summary of the presentations and discussions of the workshops.

**From reader reviews:**

**Michael Herndon:**

This book untitled Integrating Research and Practice:: Health System Leaders Working Toward High-Value Care: Workshop Summary to be one of several books which best seller in this year, that's because when you read this book you can get a lot of benefit into it. You will easily to buy this particular book in the book retail store or you can order it via online. The publisher in this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Touch screen phone. So there is no reason to your account to past this reserve from your list.

**Lanell Sessions:**

Spent a free the perfect time to be fun activity to do! A lot of people spent their leisure time with their family, or their own friends. Usually they undertaking activity like watching television, going to beach, or picnic inside park. They actually doing same every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Can be reading a book might be option to fill your free time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to test look for book, may be the reserve untitled Integrating Research and Practice:: Health System Leaders Working Toward High-Value Care: Workshop Summary can be good book to read. May be it may be best activity to you.

**Phyllis Sharrow:**

Are you kind of occupied person, only have 10 or maybe 15 minute in your morning to upgrading your mind ability or thinking skill also analytical thinking? Then you are having problem with the book in comparison with can satisfy your small amount of time to read it because pretty much everything time you only find guide that need more time to be read. Integrating Research and Practice:: Health System Leaders Working Toward High-Value Care: Workshop Summary can be your answer since it can be read by a person who have those short time problems.

**Jason Caldwell:**

Reading a book to become new life style in this 12 months; every people loves to examine a book. When you read a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, along with soon. The Integrating Research and Practice:: Health System Leaders Working Toward High-Value Care: Workshop Summary will give you new experience in reading through a book.
