Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications Jing (Selina) He, Mr. Shouling Ji, Yingshu Li, Yi Pan

Although wireless sensor networks (WSNs) have been employed across a wide range of applications, there are very few books that emphasize the algorithm description, performance analysis, and applications of network management techniques in WSNs. Filling this need, **Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications** summarizes not only traditional and classical network management techniques, but also state-of-the-art techniques in this area.

The articles presented are expository, but scholarly in nature, including the appropriate history background, a review of current thinking on the topic, and a discussion of unsolved problems. The book is organized into three sections. Section I introduces the basic concepts of WSNs and their applications, followed by the summarization of the network management techniques used in WSNs.

Section II begins by examining virtual backbone-based network management techniques. It points out some of the drawbacks in classical and existing methods and proposes several new network management techniques for WSNs that can address the shortcomings of existing methods. Each chapter in this section examines a new network management technique and includes an introduction, literature review, network model, algorithm description, theoretical analysis, and conclusion.

Section III applies proposed new techniques to some important applications in WSNs including routing, data collection, data aggregation, and query processing. It also conducts simulations to verify the performance of the proposed techniques. Each chapter in this section examines a particular application using the following structure: brief application overview, application design and implementation, performance analysis, simulation settings, and comments for different test cases/scenario configurations.

From reader reviews:

Warren Zeigler:

With other case, little individuals like to read book Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications. You can choose the best book if you appreciate reading a book. Given that we know about how is important any book Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications. You can add understanding and of course you can around the world by the book. Absolutely right, because from book you can learn everything! From your country till foreign or abroad you will be known. About simple issue until wonderful thing you may know that. In this era, we could open a book or even searching by internet product. It is called e-book. You should use it when you feel weary to go to the library. Let's read.

Starr Place:

Nowadays reading books become more and more than want or need but also be a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book which improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want drive more knowledge just go with schooling books but if you want feel happy read one having theme for entertaining for instance comic or novel. Often the Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications is kind of e-book which is giving the reader capricious experience.

Jack Morgan:

Reading a reserve tends to be new life style in this era globalization. With reading you can get a lot of information that can give you benefit in your life. Along with book everyone in this world may share their idea. Guides can also inspire a lot of people. Plenty of author can inspire all their reader with their story or maybe their experience. Not only the story that share in the ebooks. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors in this world always try to improve their ability in writing, they also doing some analysis before they write for their book. One of them is this Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications.

Donald Lee:

A lot of people always spent their very own free time to vacation or go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity that is look different you can read a new book. It is really fun to suit your needs. If you enjoy the book that you read you can spent the whole day to reading a publication. The book Wireless Ad Hoc and Sensor Networks: Management, Performance, and Applications it is very good to read. There are a lot of those who recommended this book.

They were enjoying reading this book. When you did not have enough space bringing this book you can buy typically the e-book. You can more effortlessly to read this book out of your smart phone. The price is not too expensive but this book has high quality.
