Whether you're an engineering student or looking to get into digital design as a hobby, there has never been a better time to start building. The wealth of easily available parts and resources means anybody can get started understanding logic components, tinkering with computer hardware, and developing circuitry, with or without formal training in engineering.

The secret? Take it a bit at a time, and get comfortable with not knowing what you're doing. This is the vision behind *Learn Digital Design with PSoC, a Bit at a Time*, a straightforward and hands-on approach to building with PSoC (Programmable System on a Chip). Through simple instructions and plenty of hands-on labs, readers will ease their way into the world of digital design and building, while learning the subject matter in easy-to-digest pieces.

In the vein of Blaine Readler and Don Lancaster, author Dave Van Ess draws upon his years of engineering experience to provide a fun and non-intimidating beginner's guide to circuitry. Maker Movement hobbyists, prospective engineers, and grad students alike will enjoy this laid-back yet productive approach to building with PSoC, starting off simple and slowly progressing to more and more complex circuitry.
