## Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource)

In order to successfully compete as a sustainable energy source, the value of biomass must be maximized through the production of valuable co-products in the biorefinery. Specialty chemicals and other biobased products can be extracted from biomass prior to or after the conversion process, thus increasing the overall profitability and sustainability of the biorefinery.

*Biorefinery Co-Products* highlights various co-products that are present in biomass prior to and after processing, describes strategies for their extraction, and presents examples of bioenergy feedstocks that contain high value products.

Topics covered include:

- Bioactive compounds from woody biomass
- Phytochemicals from sugar cane, citrus waste and algae
- Valuable products from corn and other oil seed crops
- Proteins from forages
- Enhancing the value of existing biomass processing streams

Aimed at academic researchers, professionals and specialists in the bioenergy industry, *Biorefinery Co-Products* is an essential text for all scientists and engineers working on the efficient separation, purification and manufacture of value-added biorefinery co-products.

### **From reader reviews:**

#### **Victor Banister:**

The knowledge that you get from Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource) could be the more deep you searching the information that hide in the words the more you get interested in reading it. It does not mean that this book is hard to be aware of but Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource) giving you joy feeling of reading. The article author conveys their point in particular way that can be understood through anyone who read this because the author of this guide is well-known enough. This kind of book also makes your vocabulary increase well. Therefore it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource) instantly.

#### **Clarence Ross:**

Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource) can be one of your basic books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The article author giving his/her effort to get every word into satisfaction arrangement in writing Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource) although doesn't forget the main stage, giving the reader the hottest as well as based confirm resource facts that maybe you can be certainly one of it. This great information can certainly drawn you into new stage of crucial contemplating.

#### **Kenneth Vargas:**

That reserve can make you to feel relax. This book Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource) was colourful and of course has pictures around. As we know that book Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource) has many kinds or type. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and believe that you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading that will.

#### **Donna Feuerstein:**

What is your hobby? Have you heard in which question when you got scholars? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person just like reading or as examining become their hobby. You must know

that reading is very important and book as to be the issue. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update about something by book. A substantial number of sorts of books that can you take to be your object. One of them is actually Biorefinery Co-Products: Phytochemicals, Primary Metabolites and Value-Added Biomass Processing (Wiley Series in Renewable Resource).
