Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries)

R.P. Chhabra

Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries) R.P. Chhabra

Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition continues to provide thorough coverage of the scientific foundations and the latest advances in particle motion in non-Newtonian media. The book demonstrates how dynamic behavior of single particles can yield useful information for modeling transport processes in complex multiphase flows.

Completely revised and expanded, this second edition covers macroscopic momentum and heat/mass transfer from a single rigid or fluid particle or ensembles of particles involving strong inter-particle interactions including packed beds, fluidized beds, and porous media with different types of non-Newtonian fluids. It reflects advances made since the publication of the previous, bestselling edition with new material on topics such as extensional flow; time-independent, time-dependent and visco-elastic fluids; free settling behavior of non-spherical particles; and particle motion in visco-elastic and visco-plastic fluids, boundary layer flows, flows in porous media, and falling object rheometry.

An excellent reference and handbook dealing with the technological aspects of non-Newtonian materials encountered in nature and in technology, this book highlights qualitative differences between the response of a Newtonian and non-Newtonian fluids in the complex flows encountered in processing applications.

From reader reviews:

Maxine Elam:

A lot of people always spent their own free time to vacation or go to the outside with their family or their friend. Did you know? Many a lot of people spent that their free time just watching TV, or even playing video games all day long. In order to try to find a new activity that's look different you can read the book. It is really fun to suit your needs. If you enjoy the book which you read you can spend 24 hours a day to reading a book. The book Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries) it is quite good to read. There are a lot of those who recommended this book. They were enjoying reading this book. If you did not have enough space to deliver this book you can buy the actual e-book. You can more quickly to read this book from the smart phone. The price is not too expensive but this book features high quality.

Vickie Hintz:

Do you have something that you want such as book? The book lovers usually prefer to choose book like comic, limited story and the biggest you are novel. Now, why not hoping Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries) that give your pleasure preference will be satisfied by reading this book. Reading behavior all over the world can be said as the means for people to know world better then how they react to the world. It can't be explained constantly that reading habit only for the geeky particular person but for all of you who wants to possibly be success person. So , for all of you who want to start reading through as your good habit, you are able to pick Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries) become your starter.

Benjamin King:

Your reading sixth sense will not betray a person, why because this Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries) reserve written by well-known writer who knows well how to make book that could be understand by anyone who all read the book. Written within good manner for you, still dripping wet every ideas and creating skill only for eliminate your own hunger then you still doubt Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries) as good book not only by the cover but also with the content. This is one publication that can break don't judge book by its cover, so do you still needing a different sixth sense to pick this kind of!? Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.

Ralph Capra:

A lot of publication has printed but it is unique. You can get it by net on social media. You can choose the most effective book for you, science, comic, novel, or whatever by means of searching from it. It is referred to as of book Bubbles, Drops, and Particles in Non-Newtonian Fluids, Second Edition (Chemical Industries). You can contribute your knowledge by it. Without making the printed book, it can add your knowledge and

make a person happier to read. It is most essential that, you must aware about guide. It can bring you from one location to other place.
