Jia Zeng, Zhi-Qiang Liu

Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) Jia Zeng, Zhi-Qiang Liu

This book discusses how to combine type-2 fuzzy sets and graphical models to solve a range of real-world pattern recognition problems such as speech recognition, handwritten Chinese character recognition, topic modeling as well as human action recognition. It covers these recent developments while also providing a comprehensive introduction to the fields of type-2 fuzzy sets and graphical models. Though primarily intended for graduate students, researchers and practitioners in fuzzy logic and pattern recognition, the book can also serve as a valuable reference work for researchers without any previous knowledge of these fields. Dr. Jia Zeng is a Professor at the School of Computer Science and Technology, Soochow University, China. Dr. Zhi-Qiang Liu is a Professor at the School of Creative Media, City University of Hong Kong, China.

From reader reviews:

Silvia McElroy:

The book untitled Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) is the book that recommended to you you just read. You can see the quality of the e-book content that will be shown to you. The language that creator use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, therefore the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) from the publisher to make you a lot more enjoy free time.

Wesley Jerkins:

Typically the book Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) has a lot info on it. So when you check out this book you can get a lot of benefit. The book was published by the very famous author. Tom makes some research before write this book. That book very easy to read you will get the point easily after scanning this book.

Charline Bynum:

Do you have something that you prefer such as book? The reserve lovers usually prefer to choose book like comic, brief story and the biggest one is novel. Now, why not hoping Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) that give your entertainment preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the opportunity for people to know world considerably better then how they react towards the world. It can't be claimed constantly that reading habit only for the geeky individual but for all of you who wants to possibly be success person. So , for all you who want to start looking at as your good habit, you may pick Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) become your starter.

Nancy Herman:

Is it an individual who having spare time after that spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) can be the solution, oh how comes? A book you know. You are and so out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these textbooks have than the others?
