# Swing and Day Trading: Evolution of a Trader

Thomas N. Bulkowski

## **Swing and Day Trading: Evolution of a Trader** Thomas N. Bulkowski **Comprehensive coverage of the four major trading styles**

Evolution of a Trader explores the four trading styles that people use when learning to trade or invest in the stock market. Often, beginners enter the stock market by:

- Buying and holding onto a stock (value investing). That works well until the trend ends or a bear market begins. Then they try
- Position trading. This is the same as buy-and-hold, except the technique sells positions before a significant trend change occurs.
- Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up and down swings. Finally, people try
- Day trading by completing their trades in a single day.

This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style.

*Trading Basics* takes an in-depth look at money management, stops, support and resistance, and offers dozens of tips every trader should know.

*Fundamental Analysis and Position Trading* discusses when to sell a buy-and-hold position, uncovers which fundamentals work best, and uses them to find stocks that become 10-baggers—stocks that climb by 10 times their original value.

*Swing and Day Trading* reveals methods to time the market swings, including specific trading setups, but it covers the basics as well, such as setting up a home trading office and how much money you can make day trading.
