The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics)

Joseph H. Silverman

The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) Joseph H. Silverman

The theory of elliptic curves is distinguished by its long history and by the diversity of the methods that have been used in its study. This book treats the arithmetic approach in its modern formulation, through the use of basic algebraic number theory and algebraic geometry. Following a brief discussion of the necessary algebro-geometric results, the book proceeds with an exposition of the geometry and the formal group of elliptic curves, elliptic curves over finite fields, the complex numbers, local fields, and global fields. Final chapters deal with integral and rational points, including Siegel's theorem and explicit computations for the curve $Y^2 = X^3 + DX$, while three appendices conclude the whole: Elliptic Curves in Characteristics 2 and 3, Group Cohomology, and an overview of more advanced topics.

From reader reviews:

Sun Byrd:

Often the book The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) has a lot of information on it. So when you make sure to read this book you can get a lot of gain. The book was authored by the very famous author. Tom makes some research ahead of write this book. This kind of book very easy to read you may get the point easily after looking over this book.

Debbie Jackson:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try to pick one book that you find out the inside because don't assess book by its include may doesn't work at this point is difficult job because you are frightened that the inside maybe not as fantastic as in the outside look likes. Maybe you answer could be The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) why because the amazing cover that make you consider regarding the content will not disappoint you actually. The inside or content will be fantastic as the outside or perhaps cover. Your reading 6th sense will directly direct you to pick up this book.

Vicki Harris:

Do you like reading a reserve? Confuse to looking for your preferred book? Or your book was rare? Why so many problem for the book? But any kind of people feel that they enjoy intended for reading. Some people likes reading, not only science book but in addition novel and The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) as well as others sources were given understanding for you. After you know how the truly great a book, you feel wish to read more and more. Science publication was created for teacher or students especially. Those guides are helping them to include their knowledge. In some other case, beside science book, any other book likes The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) to make your spare time more colorful. Many types of book like this.

Clare Andrews:

What is your hobby? Have you heard which question when you got learners? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you know that little person including reading or as reading become their hobby. You have to know that reading is very important in addition to book as to be the factor. Book is important thing to add you knowledge, except your personal teacher or lecturer. You discover good news or update regarding something by book. Many kinds of books that can you take to be your object. One of them is The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics).
