Smart Cities in Europe: Open Data in a Smart Mobility context Maria Sashinskaya

The process of urbanization continues to increase. In order to make fast growing cities more comfortable for living, local authorities are taking actions. One of the popular attempts is to make the urban area “smarter”. As a result, public sector information (PSI) and Open Data are becoming raw material and one of the basics of Smart Cities. The book is based on previous academic research work of the author and discusses the issues of “Smart Cities” and “Smart Mobility” as well as the role of PSI in the European Union. The major aim of this book is to explore how the concept of “Smart Mobility” can be practically implemented and how city data can play its role. The empirical part of the book covers the case studies of three European capitals: London, Berlin and Brussels.
