Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources provides a timely review of new and unconventional techniques to manufacture high-value products based on simple biological material. The current source for most chemicals and materials is petroleum. Anticipation of its limited future availability, along with record high prices has spurred interest in alternatives that will be both sustainable and cost-effective.

In a very structured way this book begins by describing the modern technologies that form the basis for creating a bio-based industry. Next it lists the various organisms that are suitable for bioprocessing -from bacteria to algae- and it gives their unique characteristics. These first two parts set the stage for a variety of novel, experimental bioprocesses, such as the production of medicinal chemicals, the production of chiral compounds and the design of biofuel cells. Concludes with examples where biological, renewable resources become an important feedstock for large-scale industrial production.

Bioprocessing for Value-Added Products from Renewable Resources provides a unique perspective of the industry and the field and serves as an important guide towards the future. The book is suitable for researchers, practitioners, students, and consultants in the bioprocess and biotechnology fields.

- Reviews the principles underpinning modern industrial biotechnology
- Provides a unique collection of novel bioprocesses for a sustainable future
- Gives examples of economical use of renewable resources as feedstocks
- Suitable for both non-experts and experts in the bioproduct industry

From reader reviews:

Ruth Brinkman:

The knowledge that you get from Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications may be the more deep you digging the information that hide within the words the more you get considering reading it. It does not mean that this book is hard to recognise but Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications giving you thrill feeling of reading. The author conveys their point in a number of way that can be understood by anyone who read the idea because the author of this book is well-known enough. This particular book also makes your own vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We recommend you for having that Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications instantly.

Elizabeth Bello:

Reading a book to become new life style in this calendar year; every people loves to go through a book. When you read a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you would like get information about your examine, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, as well as soon. The Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications will give you new experience in reading through a book.

Barbara Rubio:

Is it a person who having spare time then spend it whole day by watching television programs or just lying down on the bed? Do you need something totally new? This Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications can be the solution, oh how comes? A book you know. You are therefore out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these guides have than the others?

Bernard Taylor:

On this era which is the greater particular person or who has ability to do something more are more important than other. Do you want to become among it? It is just simple approach to have that. What you must do is just spending your time not very much but quite enough to possess a look at some books. One of several books in the top collection in your reading list is usually Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications. This book that is qualified as The Hungry Mountains can get you closer in growing to be precious person. By looking way up and review this guide you can get many advantages.
