Fostering Sustainable Growth in Ukraine

Fostering Sustainable Growth in Ukraine

by Anatoliy Kinakh, Prime Minister of Ukraine After a deep and long-lasting recession, the Ukrainian economy has for the past two years demonstrated some very positive dynamics in its quantitative development indicators. This is essentially the result of reforms, which still require to be consolidated in order to engage the factors and mechanisms capable of ensuring long-term qualitative and sustainable development in our economy. How do we ensure sustainable growth, and realise the improvements in the main macroeconomic indicators together with serious and complex improvements at the micro-level, which would allow us to achieve the urgently needed shifts in the social sphere? These actual problems are the main priorities of macroeconomic policy. Furthermore, the search for solutions to these problems of our transitional economy requires profound scientific analysis. The following presentations made at the Conference on "Factors of Economic Growth in Ukraine" are serious scientific contributions by prominent economists in this field.
