Special Relativity (The M.I.T. Introductory Physics Series) A.P. French

***The M.I.T. Introductory Physics Series* is the result of a program of careful study, planning, and development that began in 1960.**

The education Research Center at the Massachusetts Institute of Technology (formerly the Science Teaching Center) was established to study the process of instruction, aids thereto, and the learning process itself, with special reference to science teaching at the university level. Generous support from the National Science Foundation and from the Kettering, Shell, Victoria, W. T. Grant, and Bing Foundations provided the means for assembling and maintaining an experienced staff to cooperate with members of the Institute's Physics Department in the examination, improvement, and development of physics curriculum materials for students planning a career in the sciences.

After careful analysis of objectives and the problems involved, preliminary versions of textbooks were prepared, tested through classroom use at M.I.T. and other institutions, re-evaluated, rewritten, and tried again. Only then were the final manuscripts undertaken.

In general the books in the series will be brief. Most may be covered in a single term or less. Each will be available in either cloth or paper binding. Their brevity and structure (as well as their reasonable price) will make it possible for teachers to select topics and organize courses according to individual needs and preferences.

From reader reviews:

Teresa Dillard:

What do you regarding book? It is not important together with you? Or just adding material if you want something to explain what your own problem? How about your time? Or are you busy person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Everyone has many questions above. The doctor has to answer that question due to the fact just their can do which. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need this specific Special Relativity (The M.I.T. Introductory Physics Series) to read.

Alma Lewis:

It is possible to spend your free time you just read this book this reserve. This Special Relativity (The M.I.T. Introductory Physics Series) is simple to develop you can read it in the recreation area, in the beach, train in addition to soon. If you did not have got much space to bring typically the printed book, you can buy the particular e-book. It is make you quicker to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

William Sanders:

You will get this Special Relativity (The M.I.T. Introductory Physics Series) by browse the bookstore or Mall. Just viewing or reviewing it may to be your solve problem if you get difficulties for the knowledge. Kinds of this e-book are various. Not only by written or printed but in addition can you enjoy this book by e-book. In the modern era including now, you just looking of your mobile phone and searching what your problem.
