Women Scientists: Reflections, Challenges, and Breaking Boundaries Magdolna Hargittai

Magdolna Hargittai uses over fifteen years of in-depth conversation with female physicists, chemists, biomedical researchers, and other scientists to form cohesive ideas on the state of the modern female scientist. The compilation, based on sixty conversations, examines unique challenges that women with serious scientific aspirations face. In addition to addressing challenges and the unjustifiable underrepresentation of women at the higher levels of academia, Hargittai takes a balanced approach by discussing how some of the most successful of these women have managed to obtain professional success and personal happiness.

Women Scientists portrays scientists from different backgrounds, different geographical regions-eighteen countries from four continents-and leaders from a variety of professional backgrounds, including eight Nobel laureate women. The book is divided into three sections: "Husband and Wife Teams," "Women at the Top," and "In High Positions." Hargittai uses her own experience to introduce her first section on the lives of prominent scientific couples and addresses the joys and disadvantages of husband and wife teams. The second section is a comprehensive exploration of the struggles and triumphs of "women at the top." Hargittai introduces women from countries where relatively little has been written about female scientists. The final section focuses on women scientists involved with science administration and leadership. Hargittai's biographical sketches role models for budding scientists. The book is a much needed account of female presence and influence in the sciences.

Robert Polk:

Many people spending their moment by playing outside with friends, fun activity along with family or just watching TV all day every day. You can have new activity to spend your whole day by studying a book. Ugh, do you consider reading a book can definitely hard because you have to accept the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Smartphone. Like Women Scientists: Reflections, Challenges, and Breaking Boundaries which is finding the e-book version. So , try out this book? Let's notice.

Terry Burrows:

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's internal or real their passion. They just do what the educator want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that looking at is not important, boring as well as can't see colorful images on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Women Scientists: Reflections, Challenges, and Breaking Boundaries can make you experience more interested to read.
