Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science)

Rajiv Khosla, Ishwar Sethi, Ernesto Damiani

Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) Rajiv Khosla, Ishwar Sethi, Ernesto Damiani Intelligent Multimedia Multi-Agent Systems focuses on building intelligent successful systems. The book adopts a human-centered approach and considers various pragmatic issues and problems in areas like intelligent systems, software engineering, multimedia databases, electronic commerce, data mining, enterprise modeling and human-computer interaction for developing a human-centered virtual machine. The authors describe an ontology of the human-centered virtual machine which includes four components: activity-centered analysis component, problem solving adapter component, transformation agent component, and multimedia based interpretation component. These four components capture the external and internal planes of the system development spectrum. They integrate the physical, social and organizational reality on the external plane with stakeholder goals, tasks and incentives, and organization culture on the internal plane. The human-centered virtual machine and its four components are used for developing intelligent multimedia multi-agent systems in areas like medical decision support and health informatics, medical image retrieval, e-commerce, face detection and annotation, internet games and sales recruitment. The applications in these areas help to expound various aspects of the human-centered virtual machine including, human-centered domain modeling, distributed intelligence and communication, perceptual and cognitive task modeling, component based software development, and multimedia based data modeling. Further, the applications described in the book employ various intelligent technologies like neural networks, fuzzy logic and knowledge based systems, software engineering artifacts like agents and objects, internet technologies like XML and multimedia artifacts like image, audio, video and text.

From reader reviews:

Edna Kopec:

This Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) book is not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This particular Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) without we understand teach the one who reading through it become critical in pondering and analyzing. Don't become worry Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) without we understand teach the one who reading through it become critical in pondering and analyzing. Don't become worry Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) can bring if you are and not make your tote space or bookshelves' grow to be full because you can have it in the lovely laptop even telephone. This Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) having very good arrangement in word in addition to layout, so you will not really feel uninterested in reading.

Ellen Garcia:

Why? Because this Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) is an unordinary book that the inside of the book waiting for you to snap it but latter it will surprise you with the secret it inside. Reading this book adjacent to it was fantastic author who have write the book in such incredible way makes the content inside easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of benefits than the other book include such as help improving your ability and your critical thinking technique. So , still want to hold up having that book? If I have been you I will go to the publication store hurriedly.

David Paras:

Playing with family in a very park, coming to see the coastal world or hanging out with friends is thing that usually you might have done when you have spare time, then why you don't try point that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science), you could enjoy both. It is fine combination right, you still wish to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't understand it, oh come on its called reading friends.

Melissa Broussard:

A lot of people said that they feel bored when they reading a guide. They are directly felt the idea when they get a half portions of the book. You can choose typically the book Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) to make your personal reading is interesting. Your own personal skill of reading skill is developing when you similar to reading. Try to choose very simple book to make you enjoy to read it and mingle the opinion about book and reading especially. It is to be initially opinion for you to like to open a book and learn it. Beside that the guide Intelligent Multimedia Multi-Agent Systems: A Human-Centered Approach (The Springer International Series in Engineering and Computer Science) can to be your friend when you're experience alone and confuse in doing what must you're doing of this time.
